

Environmental Policy

ENVIRONMENTAL SUSTAINABILITY OBJECTIVES FOR THE 2020 EVENT

We are always in the running and we do our best to refine and improve the Environmental Management System of the organizational process of the Rally in collaboration with the Sustainable Mobility Commission of ACISport, the Local Authorities in compliance with the regulations and in accordance with the FIA sustainability program .

The environmental management aspects we have focused on concern the following areas:

- ✓ **The procurement of materials** where we are applying a more selective procurement strategy in order to increase the performance of goods and services and for greater control in the choice of suppliers and partners with recognized environmental commitment.
- ✓ **Waste** management for which we have identified, in close collaboration with local partners, more efficient and correct specific actions regarding the methods of collection, disposal and recycling of the same. We are encouraging the reduction of the use of disposable plastic products in order to reduce the amount of waste produced.
- ✓ The use and promotion of **alternative energy modes** by means of movement with a lower environmental impact (electric bikes, latest generation hybrid cars, electric, bio-methane mobile systems) in the RIS "Green Village", an area dedicated to the theme of Sustainable Mobility.
- ✓ Monitoring of **Carbon Footprint*** emissions which allows us to evaluate the impact

produced by the event and identify the best compensation practices to be put in place such as, for example, the controlled planting of forest surfaces in collaboration with the Park Authority Porto Conte and Forestas.

***comparison of CO₂ in the years 2018 and 2019:**

ACTIVITIES	2019	2018	Reduction
	CO2 eq tons	CO2 eq tons	CO2 eq tons
Electricity purchased and provided by site's owner	0,42	0,1	0,32
Generation of electric energy from equipment owned or hired by the Organization	17,38	17,38	0
Office and Stationery Supplies (paper, toner cartridges, etc.)	0,55	0,55	0
Waste disposal	53,23	75,16	21,93
Catering	2,76	2,76	0
Travel in vehicles leased or owned by the Organization	21,78	22,96	1,18
Cars, ships and airplanes for transportation of spectators and staff	731,75	731,75	0
Spectators' local trips to/from event	512,55	512,55	0
CO2 emissions from competition vehicles during competition	31,05	35	3,95
TOTAL	1371	1398	27

*in 2019 the emissions of CO₂ have been reduced to **-27** tons compared with 2018, corresponding to **-2%***

- ✓ **The communication plan** is another aspect on which we aim to increase commitment and involvement at all levels according to a principle of **shared social responsibility** by preferring responsible tools and responsible information materials.

The **spectators** are very important, and most people act diligently, but it is really necessary to have everyone's support in following best practices. This is why we are working to ensure that our communication project is as incisive in improving the behavioral attitude of as many people in all the various sectors.

We ask young people to support us and to spread an environmentally friendly culture with their lifestyle. Civic education and environmental protection are in fact the fundamental aspects of the message conveyed with the "WCR in schools" project.

We **professionals** are concentrating with great commitment through structured plans to promote our environmental responsibilities also at national level by extending the virtuous path of FIA environmental certification to Italian motorsport events.

 The logo for the Rally Italia Sardegna 2020. It features a red shield-like shape with a white diamond at the top containing the ACI logo. Below the shield, the text "RALLY ITALIA SARDEGNA" is written in large, bold, white letters. Underneath that, "SARDEGNA" is written in smaller letters, followed by a small flag icon, the year "2020", and the "ACI SPORT" logo.
